

Journeyman Electrician

We are looking for an experienced Journeyman Electrician for full time, year round generator installation and associated residential service work.

Position

Reporting to the General Manager, the Journeyman Electrician will lead one of our installation teams. Collaborating with other team members you will interact with our customers, kick-off each job and complete the job safely, following all code requirements and local guidelines and to the specifications that were agreed to with the customer.

Key Responsibilities

- Lead the installation team with quality installations of Kohler and Generac whole home back-up generators, including service panel upgrades, transfer switches and relays.
- Under the supervision of the Master Electrician, review system and interconnection design for adherence to Electrical Code (NEC) and industry best practice
- Attend electrical inspections as needed on behalf of the company
- Supervise and assist in the training of Apprentice electricians and other new install team members
- Assist with preparing for the next day's job. Ensure materials, tools and equipment is loaded into vans to ensure all necessary materials and tools arrive to the job site
- Participate in regular safety trainings and assist with overall crew & job site safety
- Assist with general site preparation and clean up
- Perform system commissioning and function checks and assist with completion of installation checklists
- Help to maintain tools and trucks in excellent condition.
- Remain up to date on Code requirements, hardware options, and industry best practices through CE, industry conferences, trade groups, magazines, etc.

Qualifications

- Journeyman Electrician license and at least 1 years of related experience
- Comprehensive understanding of the NEC as it relates to the installation of generators.
- Competence in design of electrical systems including electrical wire sizing, conduit sizing, installation methods, conduit bending, etc.
- Familiarity with generator models, specifications and installation best practices
- Able to troubleshoot and solve issues
- Excellent teamwork skills – ability to foster a positive team environment
- Highly organized & have ability to multi-task and set priorities
- Effectively coordinate and communicate with others

Minimum Requirements

- Comfortably able to lift 50lbs, work with tools, work in varying hot and cold temperatures
- Must have valid driver s license and clean driving record
- Must have cell phone/texting capabilities
- Basic computer/tablet knowledge

Benefits

- Position is Monday-Friday, 7 to 4. Overtime is available.
- Competitive Hourly pay based on experience, plus bonuses
- Paid Vacation and Holidays
- Company Vehicle
- Includes use of company tools
